To the Teacher

This culminating activity helps students and teachers see where there are gaps in understanding. Can students say their names clearly? Can they say the problem? Can they say the time? If students cannot do all parts of this activity independently, that is okay. Plan review time as needed.

A: TOGETHER: Read the page title.

B: “We will practice the conversation again. We will try to remember all the things we learned—time, new words and questions about home problems.”

ACTIVITY

A: Model the conversation about a home repair with a student. Have the student start the conversation.

B: As you answer each question, point to one of the pictures on the worksheet to show that you are choosing one of these problems and times.

C: TOGETHER: Complete the first line of the table by recalling the information you gave during your conversation.

D: TOGETHER or IN PAIRS: Continue practicing the dialogue (without a script, if possible) and recording students’ responses in the table. If students are able, they can mingle and practice with each other. After each interaction, they record their partner’s responses in the table.

ASSIST

■ Complete step D together. Coach pairs of students through the conversation. Then ask the whole class to recall what they said and help everyone record those answers in the table.

CHALLENGE

■ IN PAIRS: Students perform conversation roles in front of class.

A: TOGETHER: Read the page title.
B: “We have practiced many questions and answers. Today we will put all the questions and answers together and practice speaking.”

A: TOGETHER: Practice the first question and answer. Call on several students to ask and answer the question, or practice in pairs.
B: TOGETHER: Practice the rest of the questions and answers one by one.
C: Read the whole conversation while students listen and point to each word. You can read both roles or ask another teacher or student to read with you.
D: IN PAIRS: Students practice the whole conversation. Listen as they practice and provide feedback.
E: Write on the board:

1. first name
2. last name
3. phone number
4. problem

F: TOGETHER: Practice asking and answering the questions one by one, without looking at the script.
G: IN PAIRS: Students try asking and answering all the questions without looking at the script.

ASSIST
■ Have students write in their information before practicing the conversation.
■ Practice one-on-one with students, always performing the first roll (asking questions). Students say their information (give the responses).

CHALLENGE
■ Students try adding details to the conversation (eg, asking for the spelling of their name, asking for details about the problem, agreeing on a time to fix the problem).

READING TEST PRACTICE LEVEL A
No review

To the Teacher
Multiple-choice tests are common in American institutions and students need practice to understand what is expected on multiple-choice tests.

A: TOGETHER: Read the page title.
B: “Sometimes you take tests at school.” If possible, show a test booklet. “Today we will practice test questions.”

A: Review test structure. “How many questions are on this page?” “How many answers (choices) for each question?”
B: “You will choose only ONE answer for each question.”
C: Model how to fill in the bubble below the correct answer.
D: STUDENTS: Complete the questions.
E: While students work, circulate and note who is struggling. Remind students to look at the top words to choose the correct answer.
F: TOGETHER: Review the correct answers.

ASSIST
- Guide students through each item using questions. Provide additional oral or written question practice as needed:
  - “There is only ONE choice.”
  - “Color in only ONE circle.”
  - “Is this a name?” “Is this a phone number?” Point to ‘name.’ “Does this say ‘phone number?’”
  - “Find the same word. Is this the same?”
  - “Spell this word. Is it the same or different? Show me the same word.”

CHALLENGE
- Have students point to the top word and read it aloud to you. Students point to their answer and read it aloud.

F: While students work, circulate and note who is struggling. Remind students to use the picture to choose the correct answer.
G: TOGETHER: Review the correct answers.

ASSIST
- TOGETHER: Read the question and answer choices aloud before students choose an answer.

CHALLENGE
- Students demonstrate or discuss the meanings of the other word choices.

To the Teacher
Learning a language takes time. Sometimes students don't recognize how much they have learned. This activity gives students time to think about what new words they have learned.

A: TOGETHER: Read the page title.
B: “You are learning so much every day. We will think about the new words we learned. We will think about the words we need to practice more.”

A: “Look at the pictures. Do you remember the words? Circle the words you can say.”
B: Write on the board:
  ■ What is this?
C: TOGETHER: Practice the question several times.
D: IN PAIRS: Students point to a picture and ask a partner. Circulate and listen. Which pictures do students struggle to name?
E: TOGETHER: Review the words for each of the pictures. Students may suggest additional words that fit the picture (eg, light or lamp).
F: STUDENTS: Write as much of each word as they can in their notebooks.
G: Write the words on the board:
  1. smoke  2. toilet  3. light  4. hot water  5. sleep
  6. battery  7. loud  8. air conditioner  9. heat  10. night

READING SIGHT WORDS IN READ ACTIVITY

A: Review previously taught sight words lists.

To the Teacher

Students need repetition to become fluent readers, and that includes repetition of sight words. The more students are exposed to and practice reading sight words, the more fluent they will become.

Integration of sight words: Sight words are words that learners should be able to read at a glance or “on sight.” Sight words are often the small words that hold a sentence together, and thus learning sight words helps beginning readers read faster and with more fluency. Some sight words are decodable, meaning they can be “sounded out” phonetically (him, it, on). Other sight words cannot be sounded out by saying the sound of each letter (are, is, the). Both types of sight words are included in these pages.

Sight Words

In the optional word box, students are introduced to common sight words. When students are easily reading unit words, begin to include reading sight words along with unit words.

- Use a word wall or flash cards.
- Read words out of order and read with increasing speed.
- Separate words into two columns or piles: known and needs practice.
- Say and spell sight words in a sing-song voice to help memorize, for example: “the, the, T-H-E, the.”
