

C.A.R.E. Model

Comprehension

The first step in learning is making sure you understand the material.

Analysis

The second step is digging deeper. When you analyze something, you take it apart to understand how and why it functions the way it does.

Response with **E**vidence

The final step in the learning process is to respond to it. Knowledge only matters if we can apply it to our own lives. When you respond to material with your opinion, you should also support your opinion with evidence.
